RINGANA partners

RINGANA wants to grow at its site in Spain and is looking for motivated employees to help continue its success story. We started out in a small laboratory, but now we are a team of over 800 employees at 10 locations.

Your Responsibilities

- Perform preventive and corrective maintenance on machinery

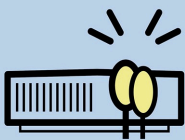

Your Qualifications

- Beneficial: Practical knowledge in mechanical engineering and electrical systems

- Troubleshoot mechanical, electrical, and hydraulic issues
- Minimize downtime by responding quickly to malfunctions
- Inspect and service equipment to prevent failures
- Keep the production area clean and organized
- Assist with equipment setup and adjustments
- Follow safety protocols and regulations
- Maintain records and report issues
- Work with production staff to improve efficiency
- Handle basic facility maintenance (lighting, ventilation, minor repairs)
- Able to work independently with attention to detail and responsibility
- Strong organizational skills
- Open to working in rotating shifts
- Excellent Spanish (C2) and very good English (C1) or German skills, both written and spoken
- **Mandatory: valid work permit for Spain**

What really counts? Your personality, your know-how, and your commitment – we reward these individually.
